Water Flow depends on your individual requirements. We will gladly explain and give you an estimate.

MAINE GROUND WATER ASSOCIATION
RECOMMENDED MINIMUM FLOW RATES
FOR SINGLE FAMILY HOMES

WELL DEPTH RECOVERY RATES

75 FEET	5 Gal. per Minute
110 FEET	4 Gal. per Minute
160 FEET	3 Gal. per Minute
250 FEET	2 Gal. per Minute
320 FEET	1 Gal. per Minute
420 FEET	1/2 Gal. per Minute

These standards are based on a static water level of approximately 25 feet below ground surface.

Every foot of a 6" well holds approximately 1 1/2 gallons of water.

The average person uses 75 gallons of water per day--a family of 4 uses 300 gallons.

DOMESTIC BEDROCK WATER WELL

Bowie Bros. Well Drilling, Inc. is a 2nd generation family owned and operated company with 50 years of experience. To assure the consumer that the well is constructed properly we use only the best methods and equipment for drilling water wells in Maine.

We construct wells by drilling through unconsolidated materials [clay, sand and or gravel] and into the bedrock. Then well casing is installed with a driveshoe to create a well seal. A good well seal is the most important part of the well, stopping the penetration of contaminated materials and solids coming from the overburden. Drilling then continues into bedrock through water bearing fractures until an adequate water supply is found.

For a water system that quietly and efficiently supplies all your water needs using top quality materials, call on:
